

In an effort to better serve our customers, a comprehensive review of our metal roofing and wall panel product offering has begun. This is part of an ongoing evaluation to identify and eliminate products with low demand. This simplification will improve our ability to provide exceptional customer experience by reducing the vast amount of metal roofing and wall panel profiles we currently offer.

As of January 30, the products listed below will no longer be available. Updates to marketing materials and the website have been updated. Please share this information with your team.

If you have any questions regarding these changes, please feel free to contact the Exceptional Metals team at 1.800.248.0280.
